SEP AG

Networkwide & Cross Platform Data Availability

Security for the future

SEP is a leading pioneer in network-wide and cross platform data availability software. Since 1992 SEP has developed industry-leading technology for data security and has integrated this into one of the fastest and most reliable data backup solutions available today. It is ideal for both - large enterprises and small to medium sized businesses.

Backup and Recovery for Changing Businesses

With SEP's proven products businesses are prepared for the future. In the field of backup, recovery and disaster recovery, data security and availability has become a safe, reliable and extremely affordable solution for today's multinational companies. SEP is the leader in heterogeneous and cross-platform data backup solutions. In addition, SEP offers a wide range of solutions for database and groupware online backup - without interrupting the availability of the database or groupware server. Even single emails can be restored. Every day businesses decide to implement the often certified SEP Backup Solutions for their virtualized systems.

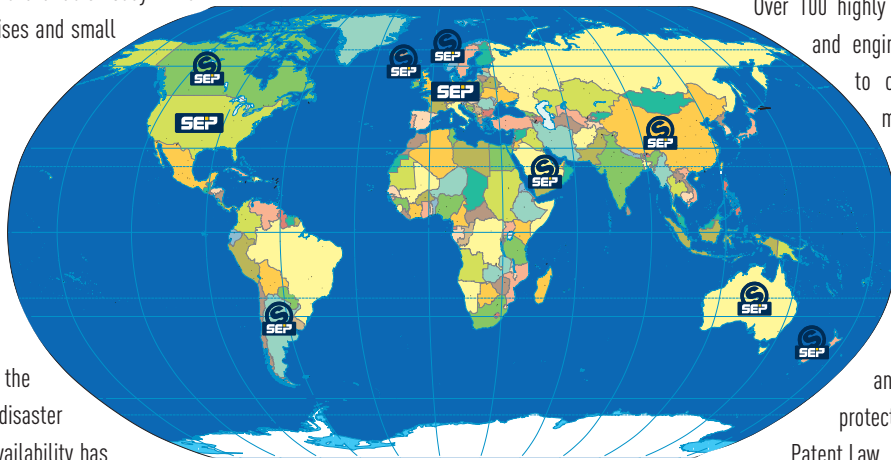

Worldwide Customer Base and Secondary Distribution

SEP's leading development staff works closely with other technology partners world wide to provide solutions for both hardware and software. These partnerships assure optimal security for SEP's customers as well as the most cost-effective solution available.

SEP is headquartered in the heart of Bavaria near Munich with a subsidiary in Cologne, Berlin and in Boulder, Colorado, USA. Sales and support is provided from around the world by experienced staff and a cadre of trained SEP Certified Administrators (SCA), VAR's and system integrators.

Many Years of Experience and Expertise

Over 100 highly trained developers and engineers have worked to create one of the most advanced and flexible backup software products available today. Our highly specialized backup designs and algorithms are protected by International Patent Law.

Plan for the Future - The Only Way to Protect Data

Find the best solutions for tough problems. Call us and we can provide experienced SEP consultants to design the best backup strategy for your company. Implementing a SEP sesam backup solution will prevent data loss and save time and money. Using SEP sesam you will be able to backup your valuable data in the least possible time and you will rest assured that you can restore it when you need it. Scheduled restores give you the assurance that your data is always ready when you need it.

In addition, SEP's disaster recovery will give you extra insurance in the unlikely event of a system failure or other catastrophe. We can accomplish complete bare system recovery when needed. Let our highly motivated SEP team help you to implement the backup and data availability solution that is best for your computing environment.

The Outstanding Features of SEP sesam:

- Virtual Machine Backup
- Certified for e.g. Ingres, RedHat, Novell, SAP, VMware
- Wide range of Database and Groupware Online Modules
- Supports many different operating systems
- Disaster Recovery on dissimilar hardware
- Easy integration with industry standard API's
- Industry leading security features
- Highly modular
- Software customizable to your needs
- Open System Architecture allows hardware independence
- Enhancements are added based on customer needs

What Users are Saying about SEP Solutions:

-  **W+D MACHINERY COMPANY INC.** (used Legato before)
Offices in USA (Kansas), Germany, Malaysia, Shanghai
"SEP sesam accomplishes all demands on data availability for SAP DB, Windows and Linux with lowest costs of operation."
-  **Weber Motor AG** (used Veritas Backup Exec before)
Offices in USA (South Carolina), Germany, Hungary
"...we needed a point in time recovery for SAP DB that works!"
-  **Bank of Cologne** (used ARCserve before)
37 Branch Offices in Germany
"SEP sesam accomplishes all recovery needs and is ideally and flexibly configurable. The overview of the current and expected business processes were a decisive criteria."
-  **ATLAS Elektronik** (used ARCserve before)
Offices all Over the World
"SEP was recommended by Novell/SUSE because of their effective online backup of Oracle databases."
-  **MAICO GmbH** (used Tivoli Storage Manager before)
Offices in Germany
"SEP sesam provides security to the entire corporation with the single mail restore for SCALIX Groupware."
-  **GRM IMS** (used Arkeia before)
9 Offices in the US
"SEP sesam was chosen due to GRM's complex requirements for data retention and backup."
-  **West Meat** (used ARCserve before)
6 Subsidiaries and Factories in Germany
"It was the crucial factor for the implementation of SEP sesam that SEP had expert knowledge in projects implementing OES."
