BARE SYSTEM RECOVERY FOR WINDOWS

SEP Software Corp.

SEP Software Corp. is a technology leader providing standardized and high performance data availability solutions for professional IT environments of all sizes. SEP sesam and its associated products deliver seamless solutions for all backup requirements.

SEP sesam ensures that data security for virtual machine environments including data backup and restore, disaster recovery and encryption can be both easily and cost-effectively achieved. SEP's software is the ultimate expression of German engineering and attention to detail. Design and programming originate from the German headquarters in Weyarn, near Munich, where overall performance and reliability are our utmost concern.

SEP sesam uses a live image backup of the system with the SEP sesam BSR Client, to the SEP sesam backup server. The repository for the data can be freely selected using a disk to disk or disk to tape strategy.

- 1 After a system disaster or drive failure, insert BSR boot media
- 2 The BSR media is booted and the CBMR Dissimilar Hardware Wizard starts. The Dissimilar Hardware Feature allows driver installation during recovery process enabling recovery to different server hardware.
- 3 Once the SEP sesam server is installed, the required saveset for the data recovery is selected and restoration begins.

Test SEP sesam BSR Today

To download a free, 30-day fully functional version of SEP sesam and SEP sesam Bare System Recovery, please visit us at <http://download.sepusa.com/>.

Dependability

Seamlessly integrated into the SEP sesam backup strategy, the administration, handling and backup of the CBMR data happens at the SEP sesam data master server.

This method ensures that in the event of a disaster, all data and information needed is available to recreate the user environment. The SEP sesam BSR process guarantees a secure and fast recovery.

SEP's software is now installed in over 40 countries around the world backing up critical company and enterprise data. SEP sesam provides the fastest possible backup and recovery available in the computer industry today.

SEP sesam is certified by Microsoft as well as many other software manufacturers.
