

Multi-Platform Data Availability

PRODUCT OVERVIEW

SEP sesam backup solutions accommodate any O/S and multi-O/S client/server architectures from small data server environments to large, heterogeneous data processing centers with expansive databases and high capacity Storage Area Networks. SEP sesam is highly scalable, award winning software that runs on one server or on 15,000. SEP sesam backs up 1 GB to multi PB's.

No time - No Problem: SEP sesam's multi-streaming technology leverages full network capabilities to utilize multiple, simultaneous back up streams to provide the fastest transfer rates and the most efficient backups possible. In optimized systems, backups exceed multiple TB per hour / per stream.

SEP sesam's DataStore and Virtual Tape Loader features increase flexibility and performance for system backups and data security at no additional cost.

SEP sesam - Ideal for Company Expansion and Data Growth

SEP sesam licensing is designed to be competitive in both the SMB and enterprise markets. At SEP Software, we don't believe users have to pay a great deal of money to get a fast, safe and reliable backup solution. SEP sesam is easy to implement and flexible and adapts easily to any growing or changing environment.

Choose from Microsoft, Linux or Unix for the main SEP sesam server and add client licenses, along with online database and groupware modules. Add Disaster Recovery, SAN capabilities and virtual machine backup capability as needed.

Our simple, a la carte licensing model holds down costs. Users never pay for more software than they need. Add modules as company needs expand and as budgets allow.

All attached computers running SEP sesam have immediate access to installed back up devices. SEP sesam licensing is SIMPLE.

SEP Easy Archive

SIMPLIFY COMPLIANCE

KEY FEATURES

Unalterable WORM Technology (Data cannot be changed)	✓
Audit Compliant - Conforms to SOX / HIPPA / GdPdU / GoBs	✓
SnapLock Interface	✓
Maximize data integrity using Storage Replication - Replicates to the Cloud	✓
Archival set manually as desired	Directory or File Level
Manage Access to the Data via Operating System	✓
Every NTFS File System can be archived	✓
Raid Support / Cluster Support	✓
Hypervisor Support	VMware Ready Hyper-V Ready Citrix Ready
File system can be archived later	✓
Archival Periods selectable - changeable	✓
Expandable (80 GB - 50 TB)	Highly Scalable
Simple installation and administration	✓
Data is erased after Archive date is reached	✓
Application Independent	✓
Supported Architectures	32 & 64 Bit
Test Copy	30 days

SEP Easy Archive

BACKUP, RESTORE & DISASTER RECOVERY SOFTWARE

Crossplatform Network Wide

CERTIFICATIONS

SEP sesam is certified on every major operating system, database and groupware application. From Microsoft (XP-2008), Linux to Unix; from Oracle to MS SQL and PostgreSQL; from Exchange to Groupwise, SEP sesam backs up your data online and on time.

SEP sesam meets or exceeds all European Security standards, as well as US data security requirements. SEP sesam complies with all EU privacy requirements and also follows the more stringent German legal requirements for data back up and recovery.

ABOUT SEP SOFTWARE CORP.

SEP has been delivering the widest range of backup products for enterprise level customers since 1996. With thousands of installations world-wide, SEP sesam provides backup solutions for all environments, both physical and virtual; delivering the fastest backup, restore and disaster recovery tools on the market today.

SEP Easy Archive uses WORM* Technology to prevent unintentional loss or deletion of data as well as unauthorized edits, changes or deletions. The predetermined Data Store is always available to authorized users for a pre-specified archival time. Existing Data Stores and files can be added to the archive at any time.

SEP Easy Archive writes to NTFS formatted disk drives, raid arrays and easily allows clustering of multiple systems and disk drives. It can be directly installed on physical servers running Microsoft or it can be installed in a virtual machine running on any Hypervisor, including VMware, Citrix, Hyper-V or XEN.

SEP Easy Archive is a valuable enhancement to your backup architecture. It provides a simple method to meet or exceed your federally mandated data archival requirements and it fully meets requirements for Sarbanes - Oxley and HIPAA.

Document Management Software solutions can also easily utilize SEP Easy Archive to find and utilize protected data on secured disk drives.
