Business Continuity for SAP ASE

SAP solutions are central to IT-environments for organizations around the world. These mission critical SAP systems need and require a world-class certified backup solution that provides both data backup and ability to recover from any disaster. These systems mandate a comprehensive business continuity plan, focusing on Recovery Point Objectives (RPO) and Recovery Time Objectives (RTO) based on company needs and policies.

SEP's certified hybrid backup and bare metal recovery solution are critical components of a sound business continuity plan. Implementing the SEP solution prevents and protects against any data loss and enables the recovery of the entire SAP environment in the event of disaster, i.e.:

- Force majeure
- Hardware failures
- Human errors
- Data corruption
- Logical and software errors

With SEP sesam, data is protected 24/7 and is always available. SEP's reliable backup solution offers numerous certifications for SAP environments and has been SAP Certified since 2002. It is the only backup solution which protects SAP ASE (Sybase) and is certified for SAP HANA 1 & 2 on Intel- and IBM Power platforms as well as SAP NetWeaver. SEP's versatile and economical data protection is ideal from SMB to large enterprises.
