Camptocamp expands its cooperation with SEP and now also distributes SEP solutions in Switzerland and France

- Backup solution "Made in Germany" optimally suited for data backup of open source applications
- Expansion to Switzerland and France planned

Holzkirchen, Deutschland/ Olten, Schweiz, 17. January 2023 – [Camptocamp](#), experts in open source enterprise management software (ERP), geographic information systems (GIS), and IT infrastructure management systems will cooperate even more closely with [SEP](#) on the subject of data backup. As an SEP Premier Gold Partner, Camptocamp will immediately expand the use of the SEP sesam backup solution to the Swiss and French markets. As a manufacturer of platform-independent backup and disaster recovery solutions "Made in Germany", SEP is ideally suited for backing up the open source environments of Camptocamp's customers, as has been shown in recent years during use in various companies in Germany.

"SEP sesam is ideally suited for the data backup of open source solutions. We are therefore pleased that we are expanding our collaboration with SEP and will cooperate even more closely in the future. We now also want to provide our customers in Switzerland and France with one of the best data backup solutions on the market. Through the partnership with SEP, we are able to secure even complex virtual and heterogeneous environments with just one solution," says Patrick Belser, Regional Director, Camptocamp.

"Data backup of open source solutions was one of the first requirements when we launched our backup solution SEP sesam 30 years ago. We are therefore all the more pleased that our Premier Gold Partner Camptocamp is strengthening its trust in our cooperation. By expanding to customer projects in Switzerland and France, we are supporting Camptocamp with backup software that is ideally suited to their solutions," says Georg Moosreiner, CEO and co-founder of SEP AG.

About SEP

SEP AG is a manufacturer of backup and disaster recovery software solutions for the protection of cross-platform, heterogeneous IT environments. The data backup solution "SEP sesam" secures a wide range of virtual environments, operating systems, applications and databases "Made in Germany". The headquarters of the company, founded in 1992, is in Holzkirchen near Munich. Support and sales in America are handled by the SEP Corporation. SEP has a strong partner network and relies on well-trained system houses for sales. Customers in more than 50 countries include Aldi Nord, SPIEGEL-Verlag, UVEX, federal ministries, public utilities, universities and manufacturing companies.
