SEP Success Story: CTAC

Ctac offers a broad portfolio of solutions, including SAP and Microsoft 'on any cloud' solutions, and provides services in the fields of IT modernisation, Connected intelligence, Transformation & Change management, Security & Trust and Business Transformation.

„We are using SEP sesam Bare System Recovery several years within our TDI platform. Our TDI is based on SUSE on IBM power. This is not an often seen solution but very stable indeed. For back-up this combination is a difficult one for many backup suppliers. SEP sesam Bare System Recovery does what it's supposed to do it back-up and we can restore. In case of a problem, and we need contact with SEP support, the problem is solved. The SEP helpdesk has the skills to solve problems in our combined platform. That is also a rarely seen knowledge."

Bertrand Oversteegen, Expert Technical Specialist CTAC
