sc synergy

Secure and highly scalable cloud storage made in Germany/ Europe

FAST LTA

Zero-Loss secondary storage made in Germany/ Europe.

UAWLT

Enterprise-grade, multi-cloud operations with built in data security made in Portugal/ Europe

SEP
The Data Protection Company

Backup & Recovery made in Germany/ Europe with a wide support matrix to cover your on-premise assets.

SAYTEC

Delivering highly secure, simplified, and resilient IT infrastructure solutions that reduce complexity and operational costs.

Sovereignty is a strategy. We make it executable.

Digital sovereignty is no longer optional.

Regulation such as NIS-2, DORA and GDPR, geopolitical uncertainty and growing dependence on non-European providers are changing how organizations think about their data. The question is no longer only where data is stored, but who controls it, under which jurisdiction, and how fast you can recover when it matters.

European jurisdiction

Vendors, software and operations under European law, with no exposure to extraterritorial access.

Full control

You decide where your data lives, who can access it and how it is protected.

Proven resilience

Immutable, ransomware-proof vaults and fast recovery when it matters.

Audit-ready compliance

Continuous monitoring and reporting to support NIS-2, DORA and GDPR requirements.

One integrated ecosystem. Your sovereign strategy.

Customers who value digital sovereignty and/or drive a sovereign strategy can pick from a fully integrated ecosystem of technology partners to execute on it. Not a patchwork of point solutions, but building blocks that work together.

About SEP

SEP is a German software company and has been developing backup and recovery solutions made in Germany for more than 30 years. With a broad support matrix for physical, virtual, cloud and container workloads, SEP protects on-premise and hybrid environments, and acts as the backbone of the European stack.
