# SEP
## Hybrid Backup

# Public Sector Clients  have Special Requirements - SEP has the Solution

Special framework conditions, continuous innovations and a tight budget constantly confront public clients, social institutions, schools and churches with major IT challenges. Constantly rising expectations for highly efficient and citizen/customer-oriented administration can be observed. High demands on data storage, data provision and data backup are the result, for which a suitable backup/recovery solution is required.

## Challenges:

**Are you facing the challenge that your current solution:**

- does not support the latest applications and databases?

- can't back up all the hypervisors you use or want to use?

- doesn't provide a backup solution for Microsoft 365 or other cloud applications?

- cannot include various open source applications?

- can't guarantee freedom from backdoors?

- cannot deliver the technical security to implement the GDPR?

- cannot secure your heterogeneous structures completely from a single source?

- does not scale optimally with your environment?

- does not offer the support and service quality you expect?

**If you are faced with the decision and are unsatisfied with your current backup software solution, then you should take a closer look at the SEP solution and talk to us.**

**We at SEP offer you a very attractive price/performance ratio with special conditions and we offer you the best German alternative.**

## Good reasons for your switch to the SEP solution:

- All departments, from company management to development, quality assurance and customer support, work near Munich. This plays an important role for data security in times of wiretapping scandals, especially in public institutions.

- Simplified by „Made in Germany" and specialized functionalities for compliance with all regulations such as
  - o GDPR
  - o ECJ „Privacy Shield" ruling
  - o BSI
  - o No-Spy rule of the Federal Ministry of the Interior
  - o No backdoors

- One solution for all environments: heterogeneous, multi-hypervisor, open source, multitude of applications and databases

- Technically Up-to-Date

- Complete backup solution for Microsoft 365, Dynamics 365, Salesforce, Google Workspace including unlimited storage space and unlimited retention period as well as GDPR compliant. Our motto: all inclusive, meaning you don't need to worry about anything else. The solution is configured for productive use in just 5 minutes.

- Scalable solution with centralized management for on-premise, cloud, physical and virtual environments.

SEP
Hybrid Backup
